

**PROTEK FIBER**  
Leading the Way in Hi-Tech Cabling

# 5 Reasons Protek Fiber Is The Only Network Cabling Service You Will Ever Need

## 1 Meticulous & Precise Work — To A Fault!

Yes, we admit we are extremely detailed when it comes to our cabling installations. In fact, what other vendors consider “good enough” we identify as mediocre — something we simply won’t tolerate! ProTek Fiber believes every job, regardless of size, is a very important piece of your business’ infrastructure. We like to think of ourselves as cabling perfectionists.

*“Each and every run was well secured and marked appropriately for future ease of use. Due to their high quality craftsmanship we know our wiring will not get snagged, become detached from the mounting or fail to perform.”*

*Charlie Adams  
Canam Steel Corporation*

## 2 ProTek Fiber Hires Only The Best Technicians!

We understand our reputation is only as good as our latest installation and our weakest technician. With that in mind we hire and groom only the best technicians working today. Our installers are certified and credentialed by the most prestigious programs in the cabling industry, so you can rely on their decisions and their work.

*“As a Certified Fiber Optic Technician, Jason has an excellent working knowledge of wire management principles. I firmly believe ProTek Fiber and Jason Horst are true assets to our industry.”*

*Arnold J. Harris  
Electronic Interface Associates, Inc.*

### 3 ProTek Fiber Guarantees Your Work Will Be Completed On Time & Within Budget!

You may think your work is a project; we view it as a promise. When choosing ProTek Fiber you can rest assured all required work will be performed within the agreed upon schedule and within budget.

*"I was impressed how Jason ensured the job progressed professionally and on schedule. I whole-heartedly recommend ProTek Fiber!"*

*Andrew Esthafer  
York Housing Authority*

### 4 You Will Never Pay For A Quote — Ever!

When your business requires a structured cabling solution, call ProTek Fiber first. We offer free proposals, never charging to provide you with a quote.

*"If you contract with ProTek Fiber you will be 100% satisfied. They continue to compliment our company very well."*

*Richard B. Toms  
Atlantic Security Systems*

### 5 Concerned You Made A Mistake With Previous Installations? We May Be Able To Improve It!

It's quite possible your current network cabling doesn't require a complete overhaul. If our cabling specialists are able to improve your existing network without incorporating a completely fresh installation, we'll tell you so, saving you money.
